Barasat Government College M.Sc. (CBCS) Zoology Syllabus (w.e.f 2019-20)

SEMESTER: I

Paper Code	Subject	Marks	Credit	Classes
	Hard Core Theory			
ZHT 101	Non-Chordates – Structure & Function	40	3	
	1 Onisin of materials			1
	 Origin of metazoans Nutrition and Digestion: 			1
	i) Food and feeding structure and mechanism of			2
	feeding and digestion in non-chordates			_
	ii) Filter feeding in Polychaeta, Crustaceans, Mollusca and Echinodermata			2
	iii) Feeding diversity in insects; symbiotic nutrition.			2
	3. Respiration:			
	i) Organs of respiration: Gills, lungs and trachea.			2
	ii) Respiratory pigments, Mechanism of respiration.			2
	4. Excretion:			2
	i) Mechanism of Osmoregulation in Protozoaii) Excretory structures and functions in Helminthes			2 2
	and Annelids, Evolution of nephridia			2
	iii) Malpighian tubule: structure and functions in			2
	Insects			_
	iv) Excretory products			1
	5. Nervous System:			
	i) Primitive Nervous systems : Cnidaria and			2
	Echinodermata.			
	ii) Advanced nervous system - Annelida, Arthropoda			2
	(Crustacea and Insecta) and Mollusca			
	(Cephalopoda). iii) Sense organs and their importance,			2
	Chemoreception, photoreception and			2
	mechanoreception, animal orientation, compound			
	eye in insects			
	6. Locomotion: Locomotor organs/ organelles and modes			
	of locomotion			
	 i) Amoeboid, Flagellar and Ciliary movement in 			2
	Protozoa.			
	ii) Principles of Hydrostatic movements in Annelida			1
	iii) Locomotion in Arthropods: Insect flight			2
	7. Reproduction:			
	i) Asexual, Sexual, Parthenogenesis,			1
	Hermaphroditism			-
	ii) Functional variations of reproductive structures in			2
	nonchordates			
	iii) Hormones involved			1
	8. Larval forms: Evolutionary significance.			1
	9. Minor phyla: Overview; evolutionary significance			1
	Books Recommended:			
	1. The Invertebrate Vol. I, Protozoa through Ctenophora:			
	Hyman L.H.			
	2. Invertebrate structure and function: Barrington E.J.W.			
	3. Evolution of Metazoan life cycle : Jagerstein G.			

	T	1	_	1
	4. The invertebrate Vol. 2: Hyman L.H.			
	5. The invertebrate Vol. 8: Hyman L.H.			
	6. Invertebrate Zoology: Barnes R.D.			
	7. Biology of higher invertebrate: Russel Hunter W.D.D.8. The Invertebrates, smaller coelomate groups. Vol. 5:			
	Hyman L.H.			
	9. Animal Parasitism : Read C.P.			
	10. Kudo R.R. (1966) Protozoology: Charler, C. T.			
	11. Invertebrates: Barradailes L.A. & Potts F.A.			
	12. Biology of lower invertebrates : Russel W.D. Hunter			
	13. Zoology of Invertebrates : Marshall A.J. & Williams			
	W.D.			
	14. A Functional anatomy of Invertebrates : Gtryyrt V. & Graham A.			
	15. Principles of comparative anatomy of Invertebrates :			
	Backlemiccher W.N.			
	16. The Evolution of Metazoa: Hadisi J.			
	17. Annelids : Dales R.P.			
	18. Biology of Crustacea: Green J.			
	19. Mollusca : Morton J. E.			
	20. Echinodermata: Nichols D.			
	21. Invertebrate Zoology: Ruppert E. E. & Barnes R.D.			
	22. Invertebrates: Brusca R.C. & Brusca G.J.23. Biology of the Invertebrates: Pechenik J.A.			
	25. Biology of the invertebrates. Techenik 3.11.			
ZHT 102	Chordates – Structure & Function	40	3	
	1 Origin of Chandatas and their place if notice			1
	1. Origin of Chordates and their classification			$\frac{1}{3}$
	2. Characteristic features and affinities of the following:			3
	a. Hemichordata			
	b. Cephalochordata			
	c. Dipnoi			
	3. Vertebrate integument, development, structure of skin in			3
	vertebrates. Derivatives of Integument glands, scales,			
	horns, claws, hoofs, feathers & hairs.			2
	4. Comparative account of Jaw suspension.			2
	5. Evolution of Heart, Aortic arches and Portal system.			2
	6. Comparative account of respiratory system and gas			2
	bladder: General function and requirements, Aquatic			
	gas exchangers, Ventilation of Internal gills, Aerial gas			
	exchangers, Ventilation of lungs: Nature, Evolution and			
	linkage			
	7. Nerves - Cranial, Peripheral and Autonomous nervous			2
	system			
	8. Sense organs: Component of sensory system/Simple			2
	receptors, General sensory organ, Special organs:			
	Olfaction, Vomeronasal and Gustatory receptor, Lateral			
	line system and Electroreception in fish			
	9. Flight adaptation in Bird			$\frac{2}{2}$
	10. Aquatic adaptation in Birds and Mammals.			2
	Books Recommended :			
	Doors Accommended.			
	Chordate Structure and Function : Waterman A.J.			
	2. Chordate Morphology : Jolie M.			
	3. Vertebrate Body: Romer A.S. & Parson T.S.			

	 4. Life of Vertebrates: Young J.Z. 5. Colbert's Evolution of the Vertebrates: A history of the backboned animals through time: Colbert E. H., Morales M. & Minkoff E. C. 6. The Pattern of Vertebrate Evolution: Holstead L.B. 7. Evolution of Chordate Structure: Smith H.M. 8. Hyman's Comparative Vertebrate Anatomy: Wake M.H. 9. Vertebrates: Comparative Anatomy, Function, Evolution: Kardong K. V. 10. Vertebrate Life: McFarland W. N., Pough F. H., Cade T. J. & Heiser J. B. 11. Analysis of Vertebrate Structure: Hildebrand M. J. 12. Comparative Anatomy of Vertebrates. Saxena R. K. & Saxena S. 13. Comparative Anatomy of the Vertebrates: Kent G. C. & Carr K. 14. Functional Anatomy of the Vertebrates: An Evolutionary Perspective: Liem K. 			
ZHT 103	Animal Physiology & Biochemistry	40	3	
	Animal physiology			
	Blood and circulation : blood corpuscles, haematopoiesis and formed elements, plasma, blood volume & its regulation, blood groups, haemoglobin, immunity,			2
	haemostasis 2. Cardiovascular system: comparative anatomy of heart structure, myogenic heart, special tissue, ECG – its principle and significance, cardiac cycle, heart as pump, blood pressure, neural and chemical regulation of all			2
	above. 3. Respiratory system: comparison of respiration in different species, anatomical consideration, transport of gases, exchange of gases, waste elimination, neural and shamingly regulation of respiration.			2
	chemical regulation of respiration 4. Nervous system: neurons, action potential, gross neuro anatomy of brain and spinal cord, central and peripheral nervous system, neural control of muscle, tone and			2
	 posture. Sense organ: vision, hearing and tactile response. Excretory system: comparative physiology of excretion, kidney, urine formation & its concentration, waste elimination, maturation, regulation of water balance, blood urine, blood pressure, electrolyte balance, acid- 			2
	 base balance. 7. Thermoregulation: comfort zone, body temperature – physical, chemical, neural regulation, acclimatization. 			2
	8. Stress and adaptation9. Digestive system : digestion, absorption, energy balance,			2
	BMR 10. Endocrinology and Reproduction: endocrine glands, basic mechanism of hormone action, neuroendocrine regulation.			2
	Biochemistry			1
	11. Structure of atoms, molecules and chemical bonds.12. Composition, structure and function of biomolecules			6

	(Carbohydrates, Lipids, Proteins, Nucleic acids and vitamins)			
	13. Stabilizing interactions (Van der Waals, electrostatic,			2
	hydrogen bonding, hydrophobic interaction, etc.).			
	14. Principles of biophysical chemistry (pH, buffer, reaction			1
	kinetics)			
	15. Bioenergetics, glycolysis, oxidative phosphorylation, coupled reaction, group transfer, and biological energy			2
	transducers.			
	16. Principles of catalysis, enzymes and enzyme kinetics,			4
	enzyme regulation, mechanism of enzyme catalysis,			
	isozymes, allosteric modulators.			4
	17. Conformation of proteins (Ramachandran plot, secondary structure, domains, motif and folds) and			4
	nucleic acids (DNA, t-RNA etc)			
	18. Metabolism of carbohydrates, lipids, amino acids,			5
	nucleotides and vitamins.			
	Books Recommended:			
	Medical Physiology: Guyton			
	Molecular Cell Biology: Lodish <i>et al.</i>			
	3. Molecular Biology of The Cell: Alberts <i>et al</i> .			
	4. Cell Biology: Cooper			
	5. Cell and Molecular Biology: G. Karp			
	6. Chapters on Biomolecules and biochemical processes in			
	Integrated Principles of Zoology: Hickman, Roberts & Larson			
	Larson			
	7 Labringer Principles of Riechamistry: Nelson and Cov			
	7. Lehninger Principles of Biochemistry: Nelson and Cox			
	8. Biochemistry: Stryer			
	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry			
ZHT 104	8. Biochemistry: Stryer	40	3	
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry	40	3	
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland.	40	3	1
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis.	40	3	1 1
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis. 3. Neurosecretion – oxytocin, vasopressin	40	3	1 1 1
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis. 3. Neurosecretion — oxytocin, vasopressin 4. Hormone receptor, Baro and chemoreceptor	40	3	1 1 1 1
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis. 3. Neurosecretion – oxytocin, vasopressin	40	3	1 1 1 1 1
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and 	40	3	1 1 1 1 1 2
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis. 3. Neurosecretion – oxytocin, vasopressin 4. Hormone receptor, Baro and chemoreceptor 5. Basic mechanism of hormone action, second messenger system 6. Pituitary gland: ultra-structure, hormones and regulations	40	3	1 1 1 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones 	40	3	1 1 1
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions 	40	3	1 1 1 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Endocrinology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones 	40	3	1 1 1 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism 	40	3	1 1 1 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical 	40	3	1 1 1 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions 	40	3	1 1 2 2 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions Endocrine pancreas: ultra-structure, biosynthesis of 	40	3	1 1 1 2 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions Endocrine pancreas: ultra-structure, biosynthesis of hormones and their functions, glucose homeostasis 	40	3	1 1 1 2 2 2 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions Endocrine pancreas: ultra-structure, biosynthesis of hormones and their functions, glucose homeostasis Testis and ovary: ultra-structure, Biosynthesis of steroid hormones 	40	3	1 1 2 2 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions Endocrine pancreas: ultra-structure, biosynthesis of hormones and their functions, glucose homeostasis Testis and ovary: ultra-structure, Biosynthesis of steroid hormones Endocrine glands, hormones and diseases (endocrine 	40	3	1 1 1 2 2 2 2 2
ZHT 104	8. Biochemistry: Stryer 9. Harper's Illustrated Biochemistry Endocrinology & Neurobiology 1. Hypothalamus, pineal and thymus gland. 2. Neuroendocrine regulation of homeostasis. 3. Neurosecretion – oxytocin, vasopressin 4. Hormone receptor, Baro and chemoreceptor 5. Basic mechanism of hormone action, second messenger system 6. Pituitary gland: ultra-structure, hormones and regulations 7. Thyroid gland: ultra-structure, biosynthesis of hormones and functions 8. Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism 9. Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions 10. Endocrine pancreas: ultra-structure, biosynthesis of hormones and their functions, glucose homeostasis 11. Testis and ovary: ultra-structure, Biosynthesis of steroid hormones 12. Endocrine glands, hormones and diseases (endocrine regulation in different diseases like breast cancer, uterine	40	3	1 1 1 2 2 2 2 2 2
ZHT 104	 Biochemistry: Stryer Harper's Illustrated Biochemistry Endocrinology & Neurobiology Hypothalamus, pineal and thymus gland. Neuroendocrine regulation of homeostasis. Neurosecretion – oxytocin, vasopressin Hormone receptor, Baro and chemoreceptor Basic mechanism of hormone action, second messenger system Pituitary gland: ultra-structure, hormones and regulations Thyroid gland: ultra-structure, biosynthesis of hormones and functions Parathyroid glands: ultra-structure, parathyroid hormones, regulation of calcium and phosphorus metabolism Adrenal gland: ultra-structure, biosynthesis of cortical and medullary hormones and their functions Endocrine pancreas: ultra-structure, biosynthesis of hormones and their functions, glucose homeostasis Testis and ovary: ultra-structure, Biosynthesis of steroid hormones Endocrine glands, hormones and diseases (endocrine 	40	3	1 1 1 2 2 2 2 2 2

	14. Types of feedback mechanisms			1
	1 1 1) pos se recuent movimumss			
	Neurobiology			
	15. Neurogenesis			1
	16. Structural and functional classification of neurons 17. Molecular conformation and ion-channels of neuronal			1 1
	membrane.			1
	18. Origin of nerve impulse.			
	19. Propagation of impulse in myelinated and non-			1
	myelinated nerve fibers.			1
	20. Ultrastructure of synapse and synaptogenesis			
	21. Excitatory and inhibitory neurotransmitters			1
	(biosynthesis, action and removal).			1
	22. Synaptic transmission of impulse.			1
	23. True structure of neuromuscular junction (NMJ), and neuromuscular transmission.			$\begin{bmatrix} 1 \\ 1 \end{bmatrix}$
	24. Membrane transport, signaling through neurolemma			1
	25. Neurodegenerative disorder (NDD), Alzheimer's			1
	disease, Parkinson's disease, Dementia etc.			2
	26. Cellular communication			
	27. Sensory reception			1
	a. Coding and control of sensory information			3
	b. Vision			
	c. Hearing			
	28. Lateral line system, Neuromast organ			1
	29. Learning and memory 30. Sleep and arousal			1 1
	30. Sleep and arousar			1
	Books Recommended:			1
	1. Exclusive Physics on C. P. Mertin Oxford			
	 Endocrine Physiology: C. R. Martin-Oxford General Endocrinology: Turner and Bagnara 			
	3. Endocrinology: Greenspan			
	4. Endocrinology: Hadley			
	5. Endocrinology: William			
	6. Comparative Endocrinology: Norris			
	7. Medical Physiology: Guyton			
	8. Molecular Cell Biology: Lodish <i>et al.</i>			
	9. Molecular Biology Of The Cell: Alberts <i>et al.</i>			
	10. Neurosciences: Purves			
	11. Foundation of Neurobiology: Fred Delcomyn			
	Hard Core Lab			
ZHL 101	Non-Chordates & Chordates	40	3	
	Non-Chordates			
	A. Major Dissections			1
	1. Stomatogastric Nervous System of Cockroach.			$\begin{bmatrix} 1 \\ 1 \end{bmatrix}$
	2. Reproductive System of Grasshopper.			2
	3. Reproductive and Nervous System of <i>Achatina</i> .			1
	4. Reproductive System of an annelid			
	B. Minor Dissections and mounting			
	Mouth parts of Mosquito - Identification of genera and			1
	sex			
	2. Haltere and mouth parts of housefly			l 1
I	3. Poison gland of spider/an insect			1

	4. Setae and Nerve Ring of an annelid			1
	C. Identification of non-chordate from museum specimens			2
	D. Study of the adaptive features of the nonchordates for their respective modes of life			2
	Chordates E. Major Dissections: 1. Arterial system, venous system, cranial nerves (Vth,			3
	VIIth, IXth and X) of teleost			1
	2. Urinogenital system of teleost3. Arterial system of Rat			1
	Accessory respiratory organ of fish			2
	F. Minor Dissections & Mounting:1. Weberian ossicle and otolith of carp2. Fish scales			1 1
	G. Identification of chordates from museum specimens			2
				2
	H. Study of the adaptive features of the chordates for their respective modes of life			
	I. Sessional & Viva			
ZHL 102	Biochemistry	30	2	
	1. Preparation of Buffer & pH adjustment			2
	 Colorimetric/Spectrophotometric Estimation of Glucose, RNA, DNA and protein (Lowry & Bradford method) 			6
	3. Determination of effect of substrate concentration and temperature on enzyme activity			2
	4. Volumetric analysis of ammonia/urea			2
	5. Estimation of Haemoglobin content			2
	6. Determination of ESR			2
	7. Sessional & Viva			
ZHL 103	Histology & Histochemistry	30	2	
	 Microtomy, Tissue preparations from rat/mice and Fixation 			2
	2. Histological Staining: Eosin-Hematoxylin, PAS, Trypan Blue & NBT cell viability tests			2
	3. Identification: Bursa of Fabricius, Spleen, Thymus,			2

Stomach, Intestine, Tongue, Lungs, Uterus & all other normal tissues	1
4. Estrous cycle of albino rats	
5. Sessional & Viva	

SEMESTER: II

Paper Code	Subject	Marks	Credit	Classes
	Hard Core Theory			
ZHT 201	Developmental Biology & Gamate Biology	40	3	
	1. Introduction: Basic concepts of development Potency, Commitment, Specification (autonomous and conditional), Induction, Competence, Determination and differentiation, Morphogenetic gradients, Cell fate and Cell lineages, Genomic equivalence and Cytoplasmic determinants.			2
	2. Techniques for the study of development: Microscopy, Microinjection, Cell sorting, Cell labeling methods.			2
	3. Sex, Gametes and Fertilization: Germ cell determinant and germ cell migration. Gamatogenesis: spermatogenesis- phases, cellular changes, Oogenesis: types, stages. Fertlization in mammals: Recognition of gametes and acrosomal reaction, Prevention of polyspermy and gamete fusion, Activation of egg metabolism			4
	4. Cellular Interactions in Development: Nieuwkoop centre and mesodermal polarity. Molecular basis of mesoderm induction. Transcription factors induced in the organizer. Neural induction, Regional specificity of induction, Genetic specificity of induction (Paracrine factors - Hedgehog family, Wnt family, TGF, BMP). Surface receptors and signal transduction pathway - RTK pathway, Smad pathway, Wnt pathway, Hedgehog pathway and cell death pathway.			4
	5. Axis and Pattern Formation in Animals: The genetics of axis specification in <i>Drosophila</i> . (Maternal effect genes, zygotic genes, gap genes, pair rule genes, segment polarity genes; homeotic selector genes, realisator genes). Axis formation in amphibian: Anterior-Posterior patterning in Amphibia. Early Mammalian Development: Mammalian Anterior-Posterior Axis Formation, Dorsal-Ventral and left-Right Axes in Mammals. Organization of Hox gene in vertebrate, Hox code hypothesis.			4

	6. The vertebrate Organizer – The amphibian organizer, Early organizer inducing centers, Organizer's role, Organizer maintenance.			2
	7. Reproductive Technologies - Assisted Reproductive Technologies: Amniocentesis, Sperm and ova bank; Artificial Insemination donor (AID); in <i>vitro</i> fertilization (IVF), procedures, variations of IVF, Success rates and complications; Gamete Intrafallopian transfer (GIFT), Intracytoplasmic sperm Injection (ICSI),- Advantages and disadvantages. Surrogate mothers.			2
	8. Teratogenesis - Developmental mechanism of teratogenesis. Contributions of teratology to developmental biology. Teratogens and induced birth defects.			2
	9. Stem cell: Embryonic stem cells, Induced pluripotent cells and Adult stem cell and regeneration therapy.			1
	10. Metamorphosis, Regeneration and Ageing Metamorphosis in Amphibians and Insects and their hormonal control Types of regeneration - Super, Hetero, Epimorphic, Morphallactic and Compensatory regeneration, Histological process during regeneration Ageing - The biology of senescence, Genes and ageing, DNA repair enzymes, Ageing and the insulin signaling cascade, Environmental and epigenetic causes of aging.			8
	Books Recommended:			
	 An introduction to Embryology: Balinsky, B. I. Developmental Biology: Gilbert, S. F. Developmental biology: Muller, W. A. Principles of Development: Wolpert, Tickle, Martinez-Arias. Essential Developmental Biology: Slack J. Instant notes in Developmental Biology: Twyman, R.M. Principles of Developmental Biology: Wilt, F. H. & Hake, S. C. Principles of Developmental Genetics: Moody, S.A. Molecular Priciples of Animal Development: Arias, A. M. & Stewart, A. Analysis of Biological Development: Kalthoff, K. Developmental Biology: Berril 			
ZHL 202	Cell, Tissue & Molecular Biology	40	3	
	1. Structural organization and function of intracellular organelles: mitochondria, Golgi bodies, lysosomes, endoplasmic reticulum			2
	2. Cytoskeleton structure and dynamics. Function of cytoskeleton and its role in motility.			2

T -		
3.	Cell division and cell cycle: Mitosis and meiosis, their regulation, steps in cell cycle, and control of cell cycle, check points and regulation	2
4.	Cellular communication: Regulation of hematopoiesis, general principles of cell communication, cell adhesion and roles of different adhesion molecules, gap junctions, extracellular matrix, integrins, neurotransmission and its regulation	2
5.	Membrane structure and function: Structure of model membrane, membrane fluidity, lipid bilayer and membrane protein diffusion, osmosis, ion channels, active transport, ion pumps, mechanism of sorting and regulation of intracellular transport, electrical properties of membranes, liposomes	3
6.	Epithelial Tissue- Basic Organization, Types, Ultrastructure of Sebaceous Gland.	2
7.	Connective Tissue- Basic Organization, Types, Collagen.	2
8.	Muscular Tissue- Basic Organization, Types, Muscle Contraction (Molecular Basis)	1
9.	Skeletal Tissue- Basic Organization, Types	2
10.	Cancer: Genetic rearrangements in progenitor cells, oncogenes, tumor suppressor genes, cancer and cell cycle, virus-induced cancer, metastasis, interaction of cancer cells with normal cells, apoptosis, therapeutic interventions of uncontrolled cell growth	2
11.	Fundamental processes in cell biology a) DNA replication, repair and recombination (Unit of replication, enzymes involved, replication origin and replication fork, fidelity of replication, extrachromosomal replicons, DNA damage and repair mechanisms, homologous and site-specific recombination).	2
	b) RNA synthesis and processing (transcription factors and machinery, formation of initiation complex, transcription activator and repressor, RNA polymerases, capping, elongation, and termination, RNA processing, RNA editing, splicing, and polyadenylation, structure and function of different types of RNA, RNA transport).	2
	c) Protein synthesis and processing (Ribosome, formation of initiation complex, initiation factors and their regulation, elongation and elongation factors, termination, genetic code, aminoacylation of tRNA, tRNA-identity, aminoacyl tRNA synthetase, and translational proof-reading, translational inhibitors, Post- translational modification of proteins).	2
	d) Control of gene expression at transcription and	2

	translation level (regulating the expression of			
	phages, viruses, prokaryotic and eukaryotic genes, role of chromatin in gene expression and gene silencing).			
	12. Apoptosis and Necrosis (definition, features of apoptotic cells, death receptor mediated, mitochondria mediated pathway, reverse apoptosis, engulfment of apoptotic body by macrophages, evasion of apoptosis by cancer, necroptosis, paraptosis, apoptosis and diseases)			2
	13. Cell signaling: Hormones and their receptors, cell surface receptor, mobile receptor, signaling through G-protein coupled receptors, signal transduction pathways (RTK and JAK-STAT, SMAD pathways), second messengers, regulation of signaling pathways, bacterial and plant two-component signaling systems, bacterial chemotaxis and quorum sensing.			2
	14. Brief account of genome organization, Prokaryotes, Eukaryotes, Centromere, Telomere, Micro, Mini Satellite, Repetitive DNA, LINES, SINES			1
	15. Extracellular organelle-mitochondrial DNA			1
	16. Ribozymes			2
	17. Molecular Biology and Recombinant DNA methods: Isolation and purification of RNA, DNA (genomic and plasmid) and proteins, different separation methods Molecular cloning of DNA or RNA fragments in bacterial and eukaryotic systems. Expression of recombinant proteins using bacterial, animal and plant vectors			2
	Books Recommended:			
	 Molecular Cell Biology: J. Darnell <i>et al</i>. Molecular Cell Biology: Lodish <i>et al</i>. Molecular Biology of The Cell: Alberts <i>et al</i>. Cell Biology: Cooper Cell and Molecular Biology: De Roberties and De Roberties Cell and Molecular Biology: G. Karp Molecular Biology: Pollard 			
ZHT 203	Ecological Theories & Applications & Animal Behaviour	40	3	
	Ecological Theories & Applications			
	1. Population Ecology: Growth patterns, dynamics, life table, survivorship curve, Doubling time, natality, mortality, age distribution, intrinsic rate of natural increase, oscillation, regulation, dispersal			2
	Metapopulation : concept, models, structure and dynamics			2

3.	Community Ecology: structure, gradient analysis, niche model, species diversity, ecotone and edge effects, competition	2
4.	Ecosystem concept: energy cycle in food web, productivity, impact of climate change; carbon taxing and trading	2
5.	System structure and function : Mangrove ecosystem/ Herbivore dominated ecosystem/Freshwater ecosystem/ wetland	4
6.	Ecology of biological and industrial invasion : Eutrofication, Acidification	1
7.	Biodegradation and bioremediation : concept, limitations, model analysis (air/water/soil)	2
8.	Waste in ecosystem and management : Agricultural wastes/Biomedical wastes/Domestic wastes	2
A	nimal Behaviour	
1.	Principles of animal behaviour: Conceptual approaches, theoretical approaches, empirical approaches; natural selection, proximate factors, observations by Nika Tinbergen	2
2.	. Learning: What animals learn?: Individual learning; social learning; Cultural transmission	1
3.	. Cooperation and conflict, aggression: Home territoriality, dispersal, Male-male competition and sexual selection- Fisher's Hypothesis and Handicap Hypothesis, parent-offspring conflict, range of cooperative behaviour and Prisoner's dilemma	2
4.	. Habitat selection, Food selection and Foraging theory	2
5.	. Aspects of socio-biology : social communication; songs and other forms of communication; social dominance, altruism and reciprocal altruism	2
6.	_	1
	. Group selection	1
	Reproductive behaviour : Mating system and Courtship	1
9.	. Language : Humans as symbolic species; signal content and structure; orientation and cues; semiochemicals	2
<u>B</u>	ooks Recommended :	
1. 2. 3.	Concept of Ecology: E.J.Kormondy	
		 _

			T	1
	M.J.Reiss			
	4. Ecology: M.Begon, C.R.Townsend & J.L.Harper			
	5. Ecology: Recliffs & Miller			
	6. Ecology: J.Krebs			
	7. An introduction to behaviour ecology: J.R.Krebs &			
	N.B.Davies			
	8. Animal Behavior : Dugartkin			
	9. Animal Behavior : Alcock			
	10. Animal Behavior : Drickamer			
	11. Behavioral Ecology: J.B.Krebs & N.B.Davis			
	12. Animal Behavior : A synthesis of ethology and			
	comparative psychology : R.A. Hinde			
ZHT 204	Biophysical Techniques & Biostatistics	40	3	
	D' 1 ' 100 1 '			
	Biophysical Techniques			1
	1. Assay : Definition, criteria of reliability			1
	2 Minor Bloom of Florida			
	2. Microscopy: Phase contrast, Fluorescence, Scanning			2
	& Transmission Electron Microscopy, Confocal			
	Microscopy, GEP, FISH, GISH, FRET			
	2 Principles and uses of analytical instruments.			
	3. Principles and uses of analytical instruments:			1
	i. Colorimetry: Principles, Colorimeter & its uses			1
	ii. Spectrophotometer, Spectrofluorometer, Mass			1
	Spectrometry			
	iii. Chromatography : Principles, Column			2
	Chromatography, GLC, HPLC, Ion-exchange			
	chromatography, Gel exclusion chromatography,			
	Affinity chromatography			
	iv. Electrophoresis : Basic Principles, PAGE, Agarose			1
	gel electrophoresis, 2-D gel electrophoresis			
	v. Centrifugation : Basic principles of Sedimentation,			1
	Differential and Density gradient centrifugation			
	vi. Crystallography and X-ray diffraction, Basic idea			1
	of NMR			
	4. Radioisotope techniques: Radioactivity and half life,			1
	radioisotopes, units of radioactivity, G-M counter,			
	solid and liquid scintillation counter,			
	Autoradiography, Metabolic labelling, Applications of			
	radioisotopes in biology			
				1
	5. Immunological techniques based on antigen-antibody			
	interactions; Enzyme Linked Immuno-sorbent Assay			
	(ELISA & RIA); Raising the antibodies – Polyclonal			
	and Monoclonal antibodies			1
	C. Distinct of all many			
	6. Blotting techniques			1
	7 Polymorosa chain reaction (PCP to the invest			1
	7. Polymerase chain reaction (PCR technique)			1
	8 Call culture techniques			1
	8. Cell culture techniques			
	a) Design and functioning of animal tissue culture			
	laboratory			
	b) Cell proliferation measurements			
	c) Cell viability testing			
	d) Culture media preparation and cell harvesting			
	methods			

1.			
	Biostatistics/Biometry : Definition and utilization in biological studies		
2.	Basic concepts of: a) Terminologies used in biostatistics: Variable, Population, Data, Sample, Estimate b) Measures of Central Tendency c) Measures of Variation d) Graphical representation of data		
3.	Hypothesis Testing and Student 't' distribution		
4.	Probability Distribution – Concept of Probability, Binomial Distribution and Poisson Distribution		
5.	Simple Linear Regression and Correlation		
6.	Chi-square test, Student's t-test		
7.	Analysis of Variance (ANOVA)		
8.	Models : Definition, Classification, Usefulness		
<u>Bo</u>	oks Recommended:		
11. 12. 13. 14. 15. 16. 17. 18. 19. 20.	Biophysical Techniques: Fryfelder Animal Cell Culture – A Practical Approach: R.W. John (Ed.) Introduction to Instrumental Analysis: R. Braun A Biologists Guide to Principles and Techniques of Practical Biochemistry: K. Wilson & K. H. Goulding Biotechnology: H. D. 3.	fossilis Other groups: Anabas testudineus, Channa striatus, Etroplus suratensis Concepts of different systems of freshwater aquaculture: Monoculture; Polyculture/ composite fish farming; Integrated fish farming; Cage culture; Pen culture; extensive, intensive, semi-intensive and Traditional systems of fish farming. Hybridization and genetic manipulation in fishes;			3
4.	Hybridization and genetic manipulation in fishes; Basic concepts of Selective breeding (Intergeneric,			3

			1	
	 interspecific); Ploidy manipulation, Androgenesis, Gynogenesis, Transgenesis: Transgene delivery, integration, expression 5. Induced breeding in carps and catfishes: Hypophysation technique, Ecological requirements for induced breeding; Concept of Bundh breeding and synthetic hormones 6. Coldwater fishery: Definition, characteristics of coldwater bodies, major genera of coldwater fishes, adaptation of coldwater fishes 			2
	Books Recommended:			
	 Aquaculture Bardach J. E. & Ryther J. H. Biotechnology & Genetics in Fisheries and Aquaculture : Beaumont A. R. & Hoare K. Biology of Fishes: Bond C. E. & Chakrabarti N. M. The Physiology of Fishes: Evans D. H. Fish and Fisheries of India: Jhingran V. G. Aquaculture: Pillay T. V. R. Textbook of Fish: Reddy P. V. G. K., Ayyappan S., Thampy D. M. & Krishna, G. Fish Biology: Srivastava, C. B. L. 			
	Elective Lab			
ZEL 301	Ecology & Environmental Biology	40	3	
	 Assessment of habitat quality – terrestrial and aquatic system Free Co₂, Dissolved O₂, Hardness, alkalinity and salinity Biological Oxygen Demand of Water 			5
	 Preparation of vermibeds and vermicast collection Evaluation of LC₅₀/LD₅₀ of a toxicant by Probit analysis 			2 2
	Evaluation of effect of toxicant on tissues – Histochemical and biochemical changes			4
	 5. Ecological comment on blood and gut parasites 6. Visit to Waste water treatment plant/Thermal Power plant 7. Sessional & Viva 			2
	Parasitology & Immunology	40	3	
	1. Post Mortem Investigation of invertebrates & vertebrates for protozoan, helminthes, arthropods and ectoparasites; their fixation, preservation, staining & mounting			4
	2. Cell counting and cell viability-Cytotoxicity Analysis: Microscopy/Hemacytometer			

3. Animal Handling and - Mouse Handling / Injection of Antigen			2
4. Preparation of serum and Isolation of Spleen, Thymus and Bone marrow cells.			2
5. Sessional & Viva			
Entomology	40	3	
1. Insect diversity, Collection, Preservation and Identification			2
2. Identification of body parts (Mounting) : antenna, mouth parts, legs, wings, sting, aedagus, etc.			2
3. Dissection of digestive system of some selected insects			2
4. Dissection of nervous system of some selected insects			2
5. Dissection of reproductive system of some selected insect			2
6. Identification of insect tissues			1
7. Slide preparation of insect haemolymph to identify different types of haemocytes			1
8. Isolation of soil insects using Tullgren Funnel/Berlese Funnel and Identification			2
9. Submission of insects from representative orders (at least from 10 different orders)			
10. Sessional & Viva			
Cytogenetics & Molecular Biology	40	3	
1. DNA isolation (from blood or tissue)			2
2. Gel Electrophoresis, Staining and analysis of DNA concentration,			2
3. Elusion of DNA from gels			2
4. Purification of DNA			2
5. PCR			2
6. Plasmid DNA isolation			2

Aquaculture & Fisheries	40	3	
Collection and Identification of commercially important fishes- Inland and marine waters			2
2. Studies of life histories of cultivated freshwater fishes, preparation and mounting of the various stages and their identification.			2
3. Pituitary gland extraction and its preservation.			2
4. Survey of aquatic plants, their collection and identification.			
5. Field Visit to a local fish farm / Institute for study of aquaculture and training.			
6. Sessional and Viva			

SEMESTER: IV

Paper Code	Subject	Marks	Credit	Classes
	Hard Core Theory			
ZHT 401	Taxonomy, Biodiversity & Conservation Biology	40	3	
	Taxonomy:			
	Taxonomic Categories : Species and Supra- and Infra Specific Categories			1
	Taxonomic Characters : Kinds, Measurements, Weighting and Analysis			1
	3. Phenetic and Cladistic Schools: Numerical Taxonomy: Analysis, Methodology; Construction of Phenogram and Cladogram; Polarity decision; Parsimony; Out group comparison; Phylogenetic groups: Monophyly, Paraphyly, Polyphyly; Determination of Genetic Distance			2
	4. Phylogenetic Trees : Understanding Phylogenetic Trees; Kinds of Phylogenetic Trees			1
	5. Trends in Taxonomy : Cytotaxonomy, Chemotaxonomy, Molecular Taxonomy; Basics of Barcoding, Applications of DNA Barcode, Constraints of DNA Taxonomy; Parataxonomy			2
	6. ICZN – its operative principles, interpretation and application of important rules, Zoological Nomenclature			1
	7. Procedures and Keys in taxonomy: Taxonomic Collections, Preservation, Curating, Process of identification; Taxonomic Keys: Types and their merits and demerits; Taxonomic publications; Types and Process of Typification			2
	8. Limitations of Biological Species Concept : Agamospecies. Dimensions of Species			1
	9. Significance of Taxonomy			1
	Biodiversity & Conservation Biology			
	10. Definition and indices of biodiversity			1

11	Tarrata of his discounity associate and	1
11.	Levels of biodiversity: genetic, species and ecosystem	1
	ccosystem	
12.	Values and uses of biodiversity	1
	·	
13.	Megadiversity and hotspots of biodiversity	1
14.	Threats to biodiversity	1
15	Duchlam of constitutionsity loss even time	1
13.	Problem of genetic diversity loss over time	1
16.	Genetic drifts including dispersion, effective and	1
	minimum viable population size, measurements of	
	variation	
17.	Review risks of biodiversity extinctions, extinction	1
	vortex	
10	Dynamic and anoticl uncentainties, namulation	2
16.	Dynamic and spatial uncertainties, population fragmentation and metapopulation, level of genetic	2
	variation in metapopulation, metapopulation and	
	extinction	
19.	Diversity in biogeographical regions and marine	1
	forms, theories on biodiversity dispersion	
20.	Rationale for wildlife conservation	1
21	Classification of wildlife according to severity of	2
21.	threats, CITES, WWF, BLI, IUCN, BNHS, IOBP,	2
	WLII	
22.	Laws, Policies and Institutions for Conservation	2
	(Biodiversity Act, Forest Protection Act, Wildlife	
	Protection Act)	
22	Models of wildlife management and consequetion with	2
23.	Models of wildlife management and conservation with special emphasis on Eastern Himalaya, Terai Wildlife	2
	& Sundarban Biosphere Reserve	
		1
24.	In situ and Ex situ conservation, prospects and	
	limitations	
25.	Socio-economic perspective of wildlife conservation.	1
Boo	oks Recommended:	
1.	Principles of Systematic Zoology : E. Mayr	
2.	Principles and Techniques of Contemporary	
	Taxonomy: D. L. J. Quicke	
3.	Principles of Systematic Zoology : E. Mayr & P. D.

ZHT 402	Evolutionary Biology & Population Genetics	40	3	
2111 102	2 volutionally 2 vology at 1 optimization deficates			
	Evolutionary Biology:			
	1. RNA world and origin of life			1
	2. Genome Evolution : i) Evolution of Multigene Family, ii) Acquisition of new genes : Mechanisms and Exon Theory			1
	3. Concerted Evolution and Molecular Drive			1
	4. Emergence of Non-Darwinism : Neutral Hypothesis, Molecular clock			1
	5. Speciation: Biological and Phylogenetic species concept, Patterns and Mechanisms of reproductive isolation; Genetic basis of Reproductive isolation; Models of Speciation: Allopatric, Parapatric, Sympatric			2
	6. Macro evolution: Concepts, Phylogenetic gradualism, Punctuated equilibrium and Gold's hypothesis; Major trends in the origin of higher categories.			2
	7. Emergence of land vertebrates			1
	8. Origin and evolution of primates and man			2

Population Genetics :		
population, Genetic polymorphism, Measures of Genetic variation 2. Allele frequencies and Equilibrium: Hardy-Weinberg law – Assumption, Derivation & Application in population genetics, Equilibrium at two or more loci and X-linked loci 3. Destabilizing forces influencing allele frequencies i) Mutation & Estimation of mutation rates ii) Natural Selection: Gametic selection, Selection against recessive and recessive lethal, Selection against dominant, Heterozygote advantage iii) Migration iv) Genetic drift, Mutation-drift balance v) Mutation-Selection balance 4. Genetic structure of population: Optimum phenotype, Selection pressure, Fisher's Theorem of Natural Selection, Canalization, Genetic Homeostasis, Genetic load, Genetic death, Mutational load 5. Inbreeding: Measures of inbreeding, inbreeding depression, Heterosis 6. Quantitative traits: Polygenic concept, Genotype-environment interaction, phenotypic variance, Heritability & its estimation, Quantitative trait loci. Books Recommended: 1. Evolution of vertebrates: E. H. Colbert 3. Introduction to Evolution: P. A. Moody 4. Evolution: Strickberger 5. Evolution: Bowler 6. Evolution: Bowler 6. Evolution: Bowler 7. Evolution and the diversity of life: E. Mayer 8. Genes & Evolution: Jha 9. Evolution & Genetics: Merrel 10. Evolutionary Genetics: M. Smyth 11. Molecular Evolution: Li & Graur 12. ZHT 403	Applied Biology & Biotechnology	40	3	
	Applied Biology			
	Cell and animal tissue culture			1
	Microbial fermentation and production of small and macro molecules; food-borne diseases			3
	3. Soil micro arthropods: types and their role in soil formation and soil fertility			1
	4. Vector Biology: Resurgence of Malaria, Major malaria vectors of India: their distribution, bioecology, potentiality and present susceptibility status			2
	5. Bioremediation and Phytoremediation			1
	6. Biosensors			1
	7. Vaccine development			1
	8. Modern hatcheries and management			1
	9. Organic farming: Organic farming in fish culture; Vermiculture: Vermicomposting, vermireactors; biogas production			2
	Biotechnology:			
	10. Biotechnology in Live stock manipulation : Fish breeding, hybridization, sex reversal, polyploidy			1
	11. Genetic Engineering; cloning strategies and application			1
	12. Transplantation Biology			1
	13. Forensic Entomology			1
	14. Medical Biotechnology: Disease diagnostic markers, gene therapy, mechanism of gene therapy (antisense, virus mediated, immunotherapy and stem cell therapy), drug delivery and targeting, forensic biotechnology			2
	15. Nanotechnology and radiation biology: concepts and application			1

	Books recommended: 1. Applied Zoology: N.Arumugam, T.Murugan, J. J. Rajeswar, R. Ram Prabu 2. Animal Cell Culture and Technology: M. Butler 3. Development of Vaccines: From discovery to clinical testing: Singh & Sreevastab 4. Concept of vaccine development: S.H.E. Kaufmann 5. Current concept of Forensic Entomology: Amnotdt, Goff, Campobasso, Grasdberger Soft Core Theory			
TICITE AND				
ZST 401	Economic Zoology 1. Apiculture: Species of Honey bees, Social organisation of Honey bee, Life history, Methods of Beekeeping, Products of Bee keeping, Bee Enemies, Bee-keeping Industry in India	25	1	3
	2. Lac Culture: Species of Lac insect, Life history, Host plant, Cultivation of Lac, Processing of Lac, Composition & Properties of Lac, Economic Importance of Lac, Enemies of Lac Cultivation, Lac Industry in India			3
	3. Sericulture: Species of Silkworm, Life history of Mulberry Silkworm, Rearing of Silkworm, Diseases of Silkworm, Composition & Economic importance of Silk, Sericulture Industry in India			3
	4. Pearl Culture : Pearl Producing Molluscs, Pearl Formation, Artificial Pearl Production, Composition of Pearl, Pearl Producing Sites in India			2
	5. Poultry: Fowl-House, Food & Feeding of Fowls, Breeds of Fowls, Breeding in Fowls, Rearing of Chickens, Incubation & Hatchery management, Poultry feeding, Housing & Equipments, Eggs & its preservation, Diseases of Poultry, Poultry Products, By-Products of Poultry			3
	6. Dairy Farming (Cattle): Breeds of Cattles, Housing, Feeding, Management, Diseases, Processing of Milk, Milk Products			3
	7. Leather Industry: Animals involved, Processing of Leather, Enemies of Leather			1
	8. Wool and Fur Industry: Types of Wool in India,			2

	Properties of Wool, Processing of Wool Manufacture, Fur Manufacturing, Fur Farming in India			
	Books recommended:			
	 Economic Zoology – G.S. Sukla & V.B.Upadhyay A Handbook on Economic Zoology – J. Ahsan, Introduction to Economic Zoology – B.S. Tomar. An Introduction to Sericulture – G.Ganga & J.S. Chetty. The world of the honey bee - A.S. Atwal. Bees and beekeeping in India – D.P. Abrol. Perspectives in Indian Apiculture – R.C. Mishra. Beekeeping – E.F. Phillips. Pleasure and Profit : Beekeeping – M.Naim. Introduction to Lac and Lac Culture – S. Chattopadhyay. Lac Culture in India – N. Ghorai Poultry Production – R.A.Singh. Rearing of Cattle – L.M.Mondal. 			
ZST 402	Parasitic diseases & Management	25	1	
	1. Amoebiasis, Trichomoniasis, Giardiasis, Trypanosomiasis, Leishmaniasis, Schistosomiasis, Filariasis, Fascioliasis, Hookworm disease, Onchocerciasis, Taeniasis, Cysticercosis, Coccidiosis, Strongyloidiasis, Chagas disease, Enterohepatitis, Toxoplasmosis, Ascariasis, Dracunculiasis, Pediculosis, Myiasis, Tick paralysis, Dengue			10
	Life history, physiology and biochemistry of malarial Parasites			2
	3. Diseases: Symptoms, treatment and management			4
	Books recommended :			·
	 The Biology Of Nematodes: Donald L. Lee Protocols In Protozoology: Lee and Soldo Biology Of Parasitism: Tschudi and Pearce Practical Exercises in Parasitology: Halton, Marshall 			
ZST 403	Genetic diseases/disorders & Management	25	1	
	Chromosomal abnormalities Autosomal changes: [Down Syndrome, Edward Syndrome, Patau's Syndrome]			2
	Sex chromosomal changes : [Kline Filter, Turner, Super Female, Super Male]			2

				1
	2. Single gene disorder Autosomal Recessive : [Sickle Cell Anaemia, PKU, alkaptonuria, albinism, thalassemia, cystic fibrosis] Autosomal Dominant : [Huntingtons Chorea, Marfan Syndrome, Polydactyly]			2
	Sex Linked Recessive : [Hemophilia, Colour Blindness]			2
	3. Multifactoreal Traits : [Cancer, Diabetes, Heart Diseases]			2
	4. Genetic counseling-methods			1
	Books Recommended:

	14. Laboratory Techniques in Modern Biology : N. Swarup et al.			
	Hard Core Lab			
ZHL 401	Taxonomy, Biodiversity & Wildlife including Field Training	40	2	
	Taxonomic key preparations (Insect/Fish as a model)			1
	2. Estimation of species density, diversity index – Shannon Index, Richness Index, Relative abundance, Species evenness, Similarity Index			1
	3. Dominance diversity analysis			1
	4. Sampling and census technique for wildlife study			1
	5. Pug mark analysis			1
	6. Use and application of global positioning system (GPS) and laser range finder in the study of biodiversity			1
	7. Field Trip to any one (terrestrial/aquatic) habitat for assessment of Biodiversity, submission of Field report			
	8. Sessional & Viva			
ZHL 402	Comprehensive Viva	20	1	
	Elective Theory			
ZET 402	Ecology & Environmental Biology	50	4	
	Ecological Modelling 1.1 Ecosystem modelling 1.2 Prey Predator System Modelling			2
	2. Autecology of Species2.1 Photoperiodism, Biological clock, Circadian rhythm			2
	3. Habitat Ecology 3.1 Fresh water Ecology 3.2 Marine Ecology 3.3 Estuarine Ecology 3.4 Terrestrial Ecology 3.5 Desert Ecology			8
	4. Ecotoxicology & Public Health 4.1 Impact of Heavy metals, Pesticides, Sewage on			8

2. Autoimmunity and associated diseases- Rheumatoid			3
Parasitology & Immunology 1. Pathogenicity and control of some human parasites (Plasmodium, Leishmania, Toxoplasma, Ancylostoma and Wuchereria.) and viral (HIV) infections	50	4	10
al. 13. Environmental Science : T.K.Khan	50

8. Fundamentals of Ecology : M.C.Dash 9. Ecology and Environment : P.D. Sharma			
Sambamurty			
6. Ecology: J.Krebs7. Ecology: N.S. Subrahmanyam 7 A.V.S.S.			
5. Ecology : Recliffs and Miller			
M.J.Reiss 4. Ecology: M.Begon, C.R.Townsend, J.L.Harper			
3. Ecology Principles and applications : J.L.Chapman &			
Concept of Ecology : E.J.Kormondy			
1. Ecology: M.L.Cain			
Books Recommended :			
Soil, Food) 6.5 Environmental Organizations and Agencies			
6.4 Environmental Quality Monitoring (Air, Water,			
6.3 Environmental Education			
6.1 Basic objectives of Environmental Management6.2 Strategy of Environment Management			
6. Management of Environmental Quality			8
tools			
5.3 Environmental Risk Assessment5.4 Environmental Biomonitoring – methods and			
5.2 Environmental Impact Assessment			
5.1 Bioindicators and environmental monitoring			T
5. Environmental Monitoring & Impact Assessment			4
4.6 Endocrine disruptors			
translocation, excretion of toxic substances 4.5 Effect of toxicants on gene			
4.4 Xenobiotic : Absorption, transformation and			
environmental clean up 4.3 Biosensors			
4.2 Bioremediation : An Emerging Biotechnology for			
environmental clean up			

arthritis and lupus			
•			
Congenital and acquired immunodeficiency			1
4. TLR – structure, function and signalling pathways.			2
5. Virus-induced cancer, metastasis, interaction of cancer cells with normal cells, apoptosis			2
6. Antigenic determinants of Immunoglobins (Isotype, Allotype & Idiotype).			2
 Cytokines (source & function of IL-1, IL-2, IL-4, IL-5, IL-6, IL-8, IL-10, IL-12, Interferons, Tumour Necrosis Factors, Tumour Growth Factors, GM-CSF, M-CSF) and Chemokines (source & function of common chemokine ligands and receptors) 			4
8. Application of immunological principles, vaccines, diagnostics tools.			3
Books Recommeded :			
1. Outlines & Highlights For Human Parasitology : Roberts and Janovy			
Parasitology : Bogitsh, Carter and Alteman			
3. Outlines & Highlights For Human Parasitology : Bogitsh			
4. NMS-Immunology: R. Hyde, Williams and Wilkins5. Basic Immunology: Functions and disorders: Abbas and Litchman			
6. Kuby's Immunology : Goldsby, Kindt and Osborn			
Entomology	50	4	
Insect Pests & Management & Industrial Entomology			
1. Insect Pests : Classification			2
2. Concepts of Economic Injury Levels: Pest surveillance, sampling methods and forecasting; Economic threshold and injury level; Determination of EIL & Calculation of Economic decision level; Insecticide resistance management in pest			1
3. Insect Control: Chemical control – nature, mode of action and resistance mechanism of some common insecticides (Organochlorines, Organophosphates, Carbamates and botanical insecticides, organic pesticides); Biological and Cultural control methods, Biotechnology in insect control, IPM			3

4.	Distribution, biology, nature of damage and	4
	management strategies of major pests of Paddy,	
	Wheat, Jute, Sugarcane, Vegetables, Mango, Tea,	
	Stored grain and Forest products	
5.	Medical, veterinary and Forensic Entomology:	6
	5.1 Vector Biology : Morphology, behavior, life cycle,	
	disease transmission sand control strategies of	
	Sand fly, Mosquitoes and Fleas; Myiasis :	
	Morphology and biology of Myiasis causing flies	
	5.2 Insects associated with cadavers	
	5.3 Poisonous insects	
	5.4 Role of insects as decomposer	
	5.5 Insects and arthropods causing harm to livestock	
	5.6 Ticks and mites of public health importance: Soft	
	and hard ticks – morphology, behaviour, life cycle,	
	mode of transmission, pathogenesis and control	
	measures; Mite causing disease : Scabies & Scrub	
	Typhus: Morphology and life cycle of causative	
	agents, mode of transmission, pathogenesis and	
	control measures; General account of allergy	
	causing mites	
6.	Genetics of Mulberry Silk Moth in reference to	2
	voltinism, breeding strategies in Mulberry Silkworms	
	& its diseases	
7.	Honey bee: Role in Pollination and production of	2
	honey, propolis and bee-wax; extraction and	
	preservation of honey	
8.	Lac insect: Life history, hosts, composition, properties	3
	and uses of lac, local cultivation practices of lac,	
	scientific method of lac cultivation, enemies of lac	
	insects, lac production in India	
9	Insect based drugs, dyes, food for man, fish, poultry	2
'	and aesthetics	2
	and destricties	
R	ooks Recommended :	
	ons recommended :	
1.	Text Book of Applied Entomology : K. P. Srivastava	
2.	Entomology And Pest Management : L.P.Pedigo	
3.	e ,	
	Ignacimuthu, s.j.	
4.		
4.	Management : A.S.Atwal & G.S. Dhaliwal	
	•	
5.	8	
	Approaches : G. S. Dhaliwal & R. Arora
