1. The process of industrialization in India is a complex one, involving the transition from a traditional agrarian economy to a modern industrial one. This process is often described as the 'peasant path to capitalism', which suggests that the development of capitalism in India was rooted in the economic changes that took place in the rural areas.

2. The process of industrialization in India is often described as the 'peasant path to capitalism'. This suggests that the development of capitalism in India was rooted in the economic changes that took place in the rural areas. The process of industrialization in India is often described as the 'peasant path to capitalism'.

3. The process of industrialization in India is often described as the 'peasant path to capitalism'. This suggests that the development of capitalism in India was rooted in the economic changes that took place in the rural areas. The process of industrialization in India is often described as the 'peasant path to capitalism'.

4. The process of industrialization in India is often described as the 'peasant path to capitalism'. This suggests that the development of capitalism in India was rooted in the economic changes that took place in the rural areas.
