Brief Report:

The P.G. Department of Botany, in collaboration with IQAC, Barasat Government College, celebrated the International Day for Biodiversity with the inauguration of the latest edition of the wall magazine, "Blooming Buds 2.2." The magazine, which has been a consistent platform for inspiring environmental stewardship, was inaugurated by Prof. Gour Gopal Maity (Retired Professor, Kalyani University) and Dr. Samar Chattopadhyay, Principal of Barasat Government College. Dedicated to nature conservation and biodiversity, "Blooming Buds" continues the department's legacy of raising awareness and encouraging students to take an active role in environmental preservation.

On the same day, a field visit to Kishalaya Children's Home was conducted, focused on "Plants and their Diversity." Led by the distinguished resource person, Prof. Gour Gopal Maity, the field visit was attended by faculty members, including Dr. N.C. Karmakar (H.O.D-P.G.Dept. of Botany), Dr. Nirmalendu Das, and Dr. Sautrik Basu, along with enthusiastic students from both undergraduate and postgraduate programs. The participants explored a variety of plant species in their natural habitats, studying the rich diversity of flora found in the region. Prof. G.G.Maity guided the group through the field visit, sharing his extensive expertise on plant taxonomy, ecology, and biodiversity. He highlighted the importance of understanding the relationships between different plant species and their role in ecosystems, while also discussing the ecological services they provide. The visit allowed students to observe plants in their native environments, learning to identify various species and understanding their adaptive features.

An interactive session followed, where students discussed plant conservation and the significance of fieldwork in botanical studies, further reinforcing the critical need for biodiversity conservation and encouraging active student involvement in ecological preservation efforts.
