

REPORT ON World Cancer Day 2024

World Cancer Day is an international day marked on **4 February** to raise awareness of cancer and to encourage its prevention, detection, and treatment. World Cancer Day reminds us of the global emergency that is cancer and how each of us play our part in controlling the disease. World Cancer Day unites people in the fight against cancer, raising awareness about prevention, detection, and treatment. It aims to reduce stigma, promote education, and encourage action. Regular screenings for breast, cervical, colorectal, and lung cancers are crucial in early detection and intervention. By raising worldwide awareness, improving education and catalysing personal, collective and government action, we are all working together to reimagine a world where millions of preventable cancer deaths are saved and access to life-saving cancer treatment.

Dept of Zoology, Barasat Govt. College celebrated World Cancer Day 2024 by making poster competition on **06.02.2024**. The main goal was to educate people about its signs, symptoms, and risk factors. It also served as a reminder for everyone to make healthy lifestyle choices that can help to prevent cancer. Talk Cancer, has consistently high impact for participants by increasing their knowledge of cancer risk factors.

Teachers who served as judges for this poster competition related to cancer awareness from Dept. of Botany and Dept. of Geography are thankfully acknowledged.
