

## **Production and Distribution of Hand sanitizer during Covid -19 Outbreak**

**Time:** March, 2020

**Preparation:** During the initial phase of global Covid 19 Outbreak, an Outreach initiative was taken up by Barasat Government College. Hand sanitizers were bulk produced by the teaching and non teaching staff of the Department of Chemistry abiding WHO guidelines.

**Distribution:** Considering the urgency and gravity of the Covid situation, College authority decided to hand over the sanitizers to the local Police Station for distribution to common people. Some bottles were also given to the children of Kishalaya Orphanage Home situated near the College on 20.03.2020.

The college therefore, successfully played a significant role as an academic institution contributing towards public health benefit in our society with an aim to reach commoners and provide a relief. Such activity promotes the idea that knowledge-based education of any Academic Institution must be translated to practical implementation as far as applicable and reaches the commoners during urgent necessity.

**Distribution of College made Hand sanitizers to Local Police Station and Kishalaya Home (Orphanage)**
